## PROGRAM-1

Title : Blinking of LED.

Aim : To make LED blink using an arduino board.

Hardware Required: Arduino board, Wire, Resistor, LED

Circuit Diagram:

Code:

```
void setup()
{
  pinMode (13, OUTPUT)
}
void loop()
{
  digitalWrite (13, HIGH);
  delay (1000);
  digitalWrite (13, LOW);
  delay (1000);
}
```

Observation / Output :

The light blinks with 1 second intervals.
